THE BALLOON FISH.

Another name for this fish is the spiny boxfish. The balloon fish has no scales. Projecting through its akin are numerous short and thick but sharp spines, somewhat resembling little horns. Each of these spines springs from a broad hase beneath the skin; the bases of the spines form practically a buny covering under the skin, protecting the soft part of the fish abdy. From the shape of the fish litself, and from this box-like covering over the top and sides of its body, and the projecting spines, the fish takes its name of spiny boxfish.

Inflation may be the means of enabling the balloon fish to evade capture. The fish may when distended be larger than the mouth of its pursuer; if captured, by ejecting the air or water with which it is inflated, the fish may reduce itself to its usual size and thus escape. Its sharp spines are another means of defence. The balloon fish's body is broad, and not of great depth; its belly, or under side, which is the inflatable part of the body, is, when not inflated, almost fist, straight across from side to ende of the fish. Its designation of spotted and striped come from the peculiar pattern of its coloration; the body has a number of large black spois and numerous parallel black stripes running irregularly, something after the fashion of, the zebra's stripes, and separated by yellow interspaces of about the same whath; so that the fish seems to be striped black and yellow. The belly or under side of the body has a number of large black spois and numerous parallel black and separated by a wide tace. The breast fins are large and far back toward the tail. The tail fin is large and fanshabed. While the balloon fish has large fins, it is still a heavy swylumer. This is due partly to its clumsy shape, partly to the fact that its dorsal and anal fins are large and far back toward the tail. The tail fin is large and fanshabed. While the balloon fish has large fins, it is still a heavy swylumer. This is due partly to the rigidity of the tail, due to the box-like bony covering in whi tumn Shapes In untrimmed French Felt Hats, Turbans, and Bonnets, with plain, wire, and velvet edges; edges in all the leading colors.

#### IMPORTED HOSIERY At Extremely Low Prices.

ciety, died there recently within a fortnight of each other. They were twin brothers, named Anatole and Hippolyte Lionnet, and so much alike that they could not be told apart. They were fat little men, under five feet in height, with big heads surmounted by thick black hair. One had a parlor tenor voice, while the other was a baritone. Both were good enough musicians to make a success of their enter-aluments, which consisted of singing sentimental ballads and duets, together with recitations, in parlors. Under the Second Empire they were taken up by the Princess Mathilde, who made them fashlonable, and in this way they became known to the literary, artistic, and court society of Parls. They sang regularly at Rossini's, at the Princess Mathilde's musicales, at those of the Duke de Monchy, the Duke de Morny, Princess de Metternich, and repeatedly before the Emperor and Empress in the Tuilerles. When their reputation was highest they were summoned to St. Petersburg to sing before the court.

With the fall of Napoleon their day passed, musical taste changed, the hour for sentimental dittles went by, and g adually the two brothers lost their occupations. They kept up their relations with artists and writers, however, and in their latter years nuade it a business to get up concerts for all sorts of charities. Anatole, who had been brought up as a practical lithographer, did a little of everything—wrote libretos, composed nusic, drew, and engravel. For some time neat they had been in great destitution, which they concealed from their friends, and Hippolyte was dying when the sudden death of Anatole mate their necessites known. The only thing that could be done for the little men, however, by that time was to give them a first-class funeral. That their friends provided, and the queer streak of sentiment that runs through Frenchmen was shown by the number of utterstrangers who followed the little singers to the grave. Ladies' fine gauge Colored Cotton Hose, spliced heels and toes, tan, mode and slate colored uppers, with stainless black boots and plain black, also Men's 40 gauge tan and stainless black Half Hose, 19 ct. quality, at 12th cits her pair. at 12 cts. per pair.

OPEN LABOR DAY.

Breoklyn Advertigements.

Enown Also as the Swelldah, or Swell-tond, and as the Spiny Boxdah. OURNEAV The balloon fish, described also as the spotted and striped balloon fish, is so called on account of its power of inflating itself into a shape someof its power of infatting itself into a snaps some-what resembling that of a balloon, which it does by taking air or water, usually air, into the abdeminal cavity. It is also known as the swellfish, or swelltoad. The picture here pre-sented is of a balloon fleb, now at the New York Aquarium; it shows the fish in its normal shape, not inflated.

# BURNHAM. BROOKLYN.

CLOSED MONDAY, September 7.

Our Advance Showing of

FANCY DRESS GOODS.

TUESDAY, SEPT 8.

We will exhibit on Tuesday our first invoice of FALL and WINTER NOVELTIES in the most exclusive and choicest designs.
